

Faraz Ahmad

Deputy Programme Manager
- Centre for Science and Environment

Faraz is an experienced water and sanitation professional with over 11 years of expertise in WASH, circular economy, and water efficiency. Currently serving as the Deputy Programme Manager at the Centre for Science and Environment, Faraz leads advocacy, research, and capacity-building programs for WASH initiatives across South Asia and Africa, collaborating with national programs like Namami Gange, Jal Jeevan Mission, and SBM 2.0.

Previously, as Associate Counsellor at the Confederation of Indian Industry, Faraz managed 17+ watershed-level water resource projects across 10 states and 50 districts in India, overseeing project design, client relations, and team coordination.

Faraz's early career as a Geologist at WAPCOS Limited involved contributing to key government projects related to aquifer mapping and groundwater management. With a strong focus on sustainability, capacity building, and innovation, Faraz is committed to driving impactful solutions for water resilience and sanitation challenges across diverse regions.
