

Deepak Kumar Singhal

**Executive Engineer - Environment,
Government of Rajasthan**

Deepak is a seasoned Environmental Engineer with extensive experience in industrial consultancy and public service. Over the past decade, he has specialized in waste management, environmental policy implementation, and sustainable solutions.

From 2012 to 2017, Deepak worked as an Environmental Consultant with the Confederation of Indian Industry (CII), conducting over 50 environmental audits for leading organizations such as ONGC, FMCG companies, steel plants, and cement industries. He identified inefficiencies in resource use and waste generation, providing actionable strategies to enhance sustainability and compliance.

Since 2017, Deepak has served as an Executive Engineer (Environment) with the Government of Rajasthan, contributing significantly to the Swachh Bharat Mission (Urban). He has led large-scale waste management initiatives, including the remediation of 57 lakh cubic meters of legacy waste, and developed innovative waste-to-energy models. His areas of expertise include solid and liquid waste management, wastewater treatment, and environmental audits. A published researcher, Deepak has advanced sustainable practices through his work, transforming waste disposal systems and fostering a cleaner environment in both industrial and urban settings.
